ABOUT AMSY

Amsy is a construction and rehabilitation company driven to elevate spaces and preserve legacies. Our expertise spans restoration, renovation, construction, adaptive reuse, and FF&E/fit-outs, allowing us to offer a comprehensive approach to projects. We don't just inherit the past, we revolutionize it. By blending exceptional craftsmanship with a forward-thinking approach, we deliver sustainable engineering solutions that exceed international expectations.

With a vision for regional growth and global influence, Amsy remains dedicated to shaping the future of restoration, renovation, and design. Through innovation, collaboration, and sustainability, we strive to leave a lasting legacy, one project at a time.

OUR VISION & MISSION

Our Vision

At Amsy, our vision is driven by a commitment to **unmatched craftsmanship**. We use a powerful combination of time-tested methods and fresh ideas to deliver exceptional projects that meet international standards. This dedication extends to historical restorations, where we carefully revitalize structures, ensuring their stories remain relevant. We achieve this through **modern enhancements and enduring aesthetics**, transforming these treasures for future generations.

Our Mission

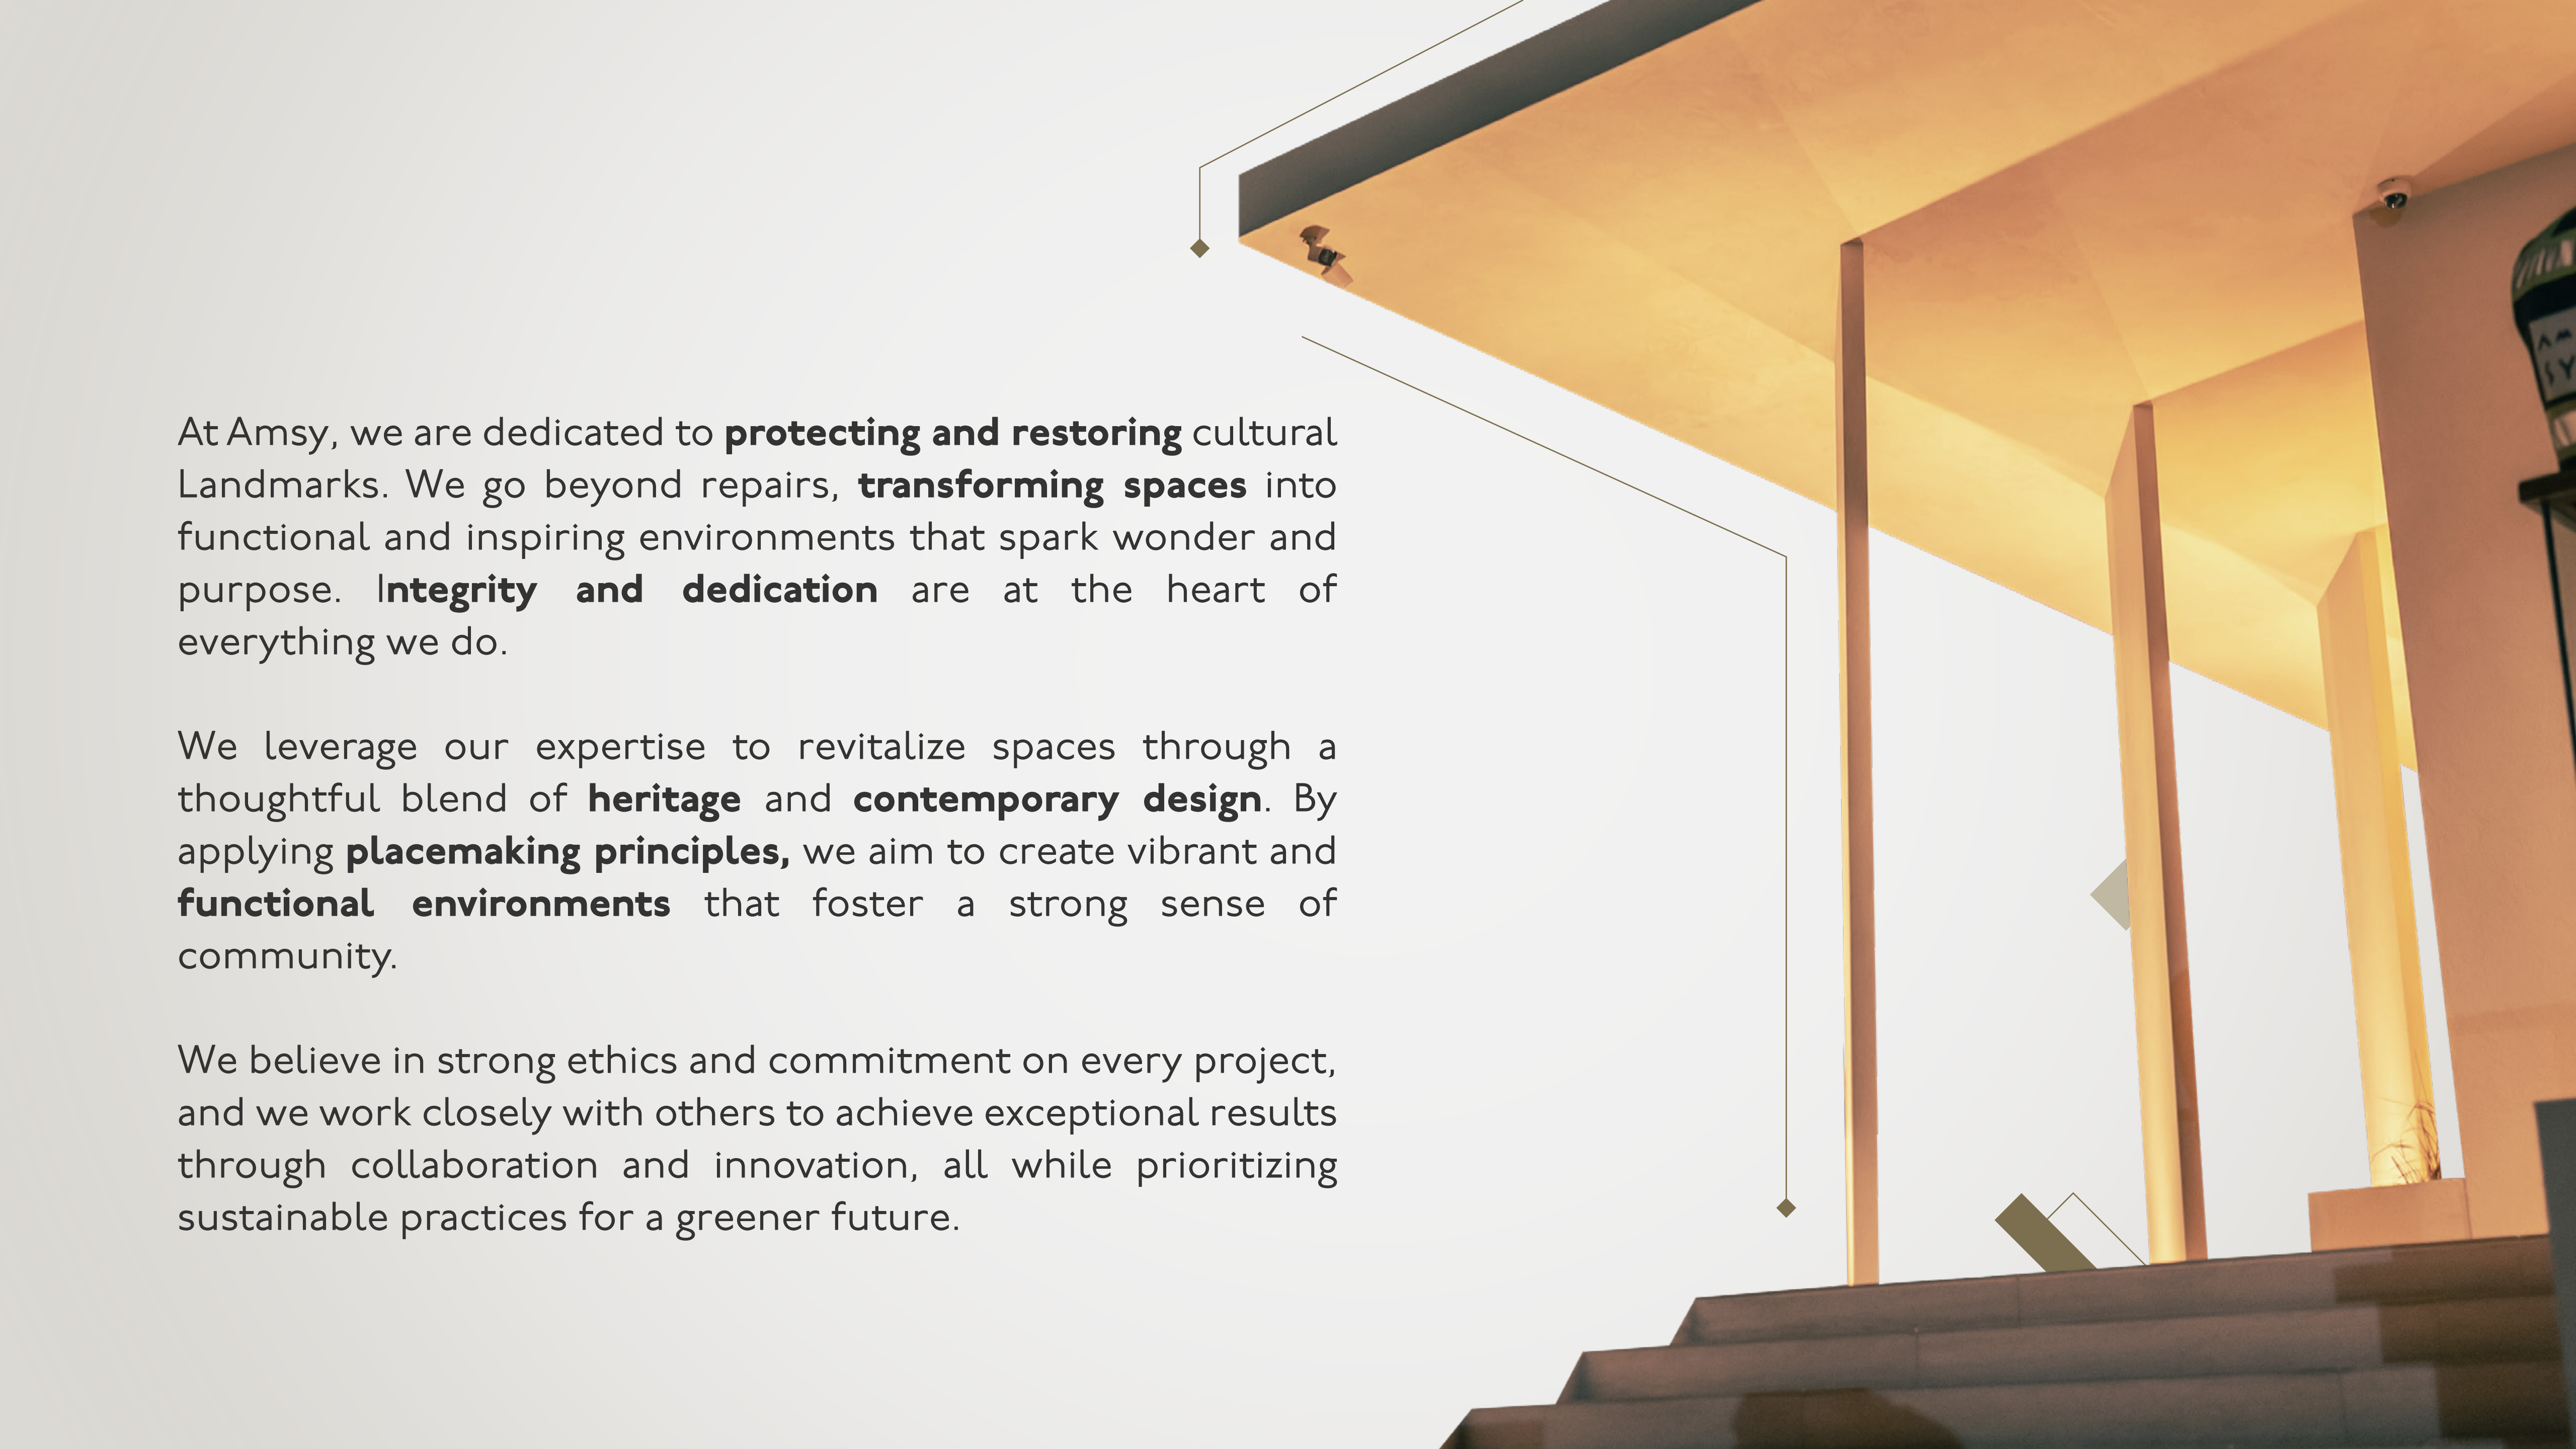

Client-centric solutions is a top priority at Amsy, exceeding expectations with tailored services that meet the specific needs of government entities. Beyond individual projects, our passion for **pioneering design** leads us to redefine spaces with functional features and enduring beauty. This commitment to innovation, coupled with a focus on **collaboration and sustainable** practices, shapes the future of the restoration, renovation, and design industries in Saudi Arabia and the MENA region. This focus on the future, built on a foundation of excellence and respect for the past, is the core of everything we do at Amsy.

Amsy's dedication to excellence and unwavering commitment to cultural heritage preservation perfectly align with the Saudi Vision 2030. We are proud to contribute to the development and preservation of the built environment within the Kingdom.

OUR VALUES

At Amsy, we are dedicated to **protecting and restoring** cultural Landmarks. We go beyond repairs, **transforming spaces** into functional and inspiring environments that spark wonder and purpose. **Integrity and dedication** are at the heart of everything we do.

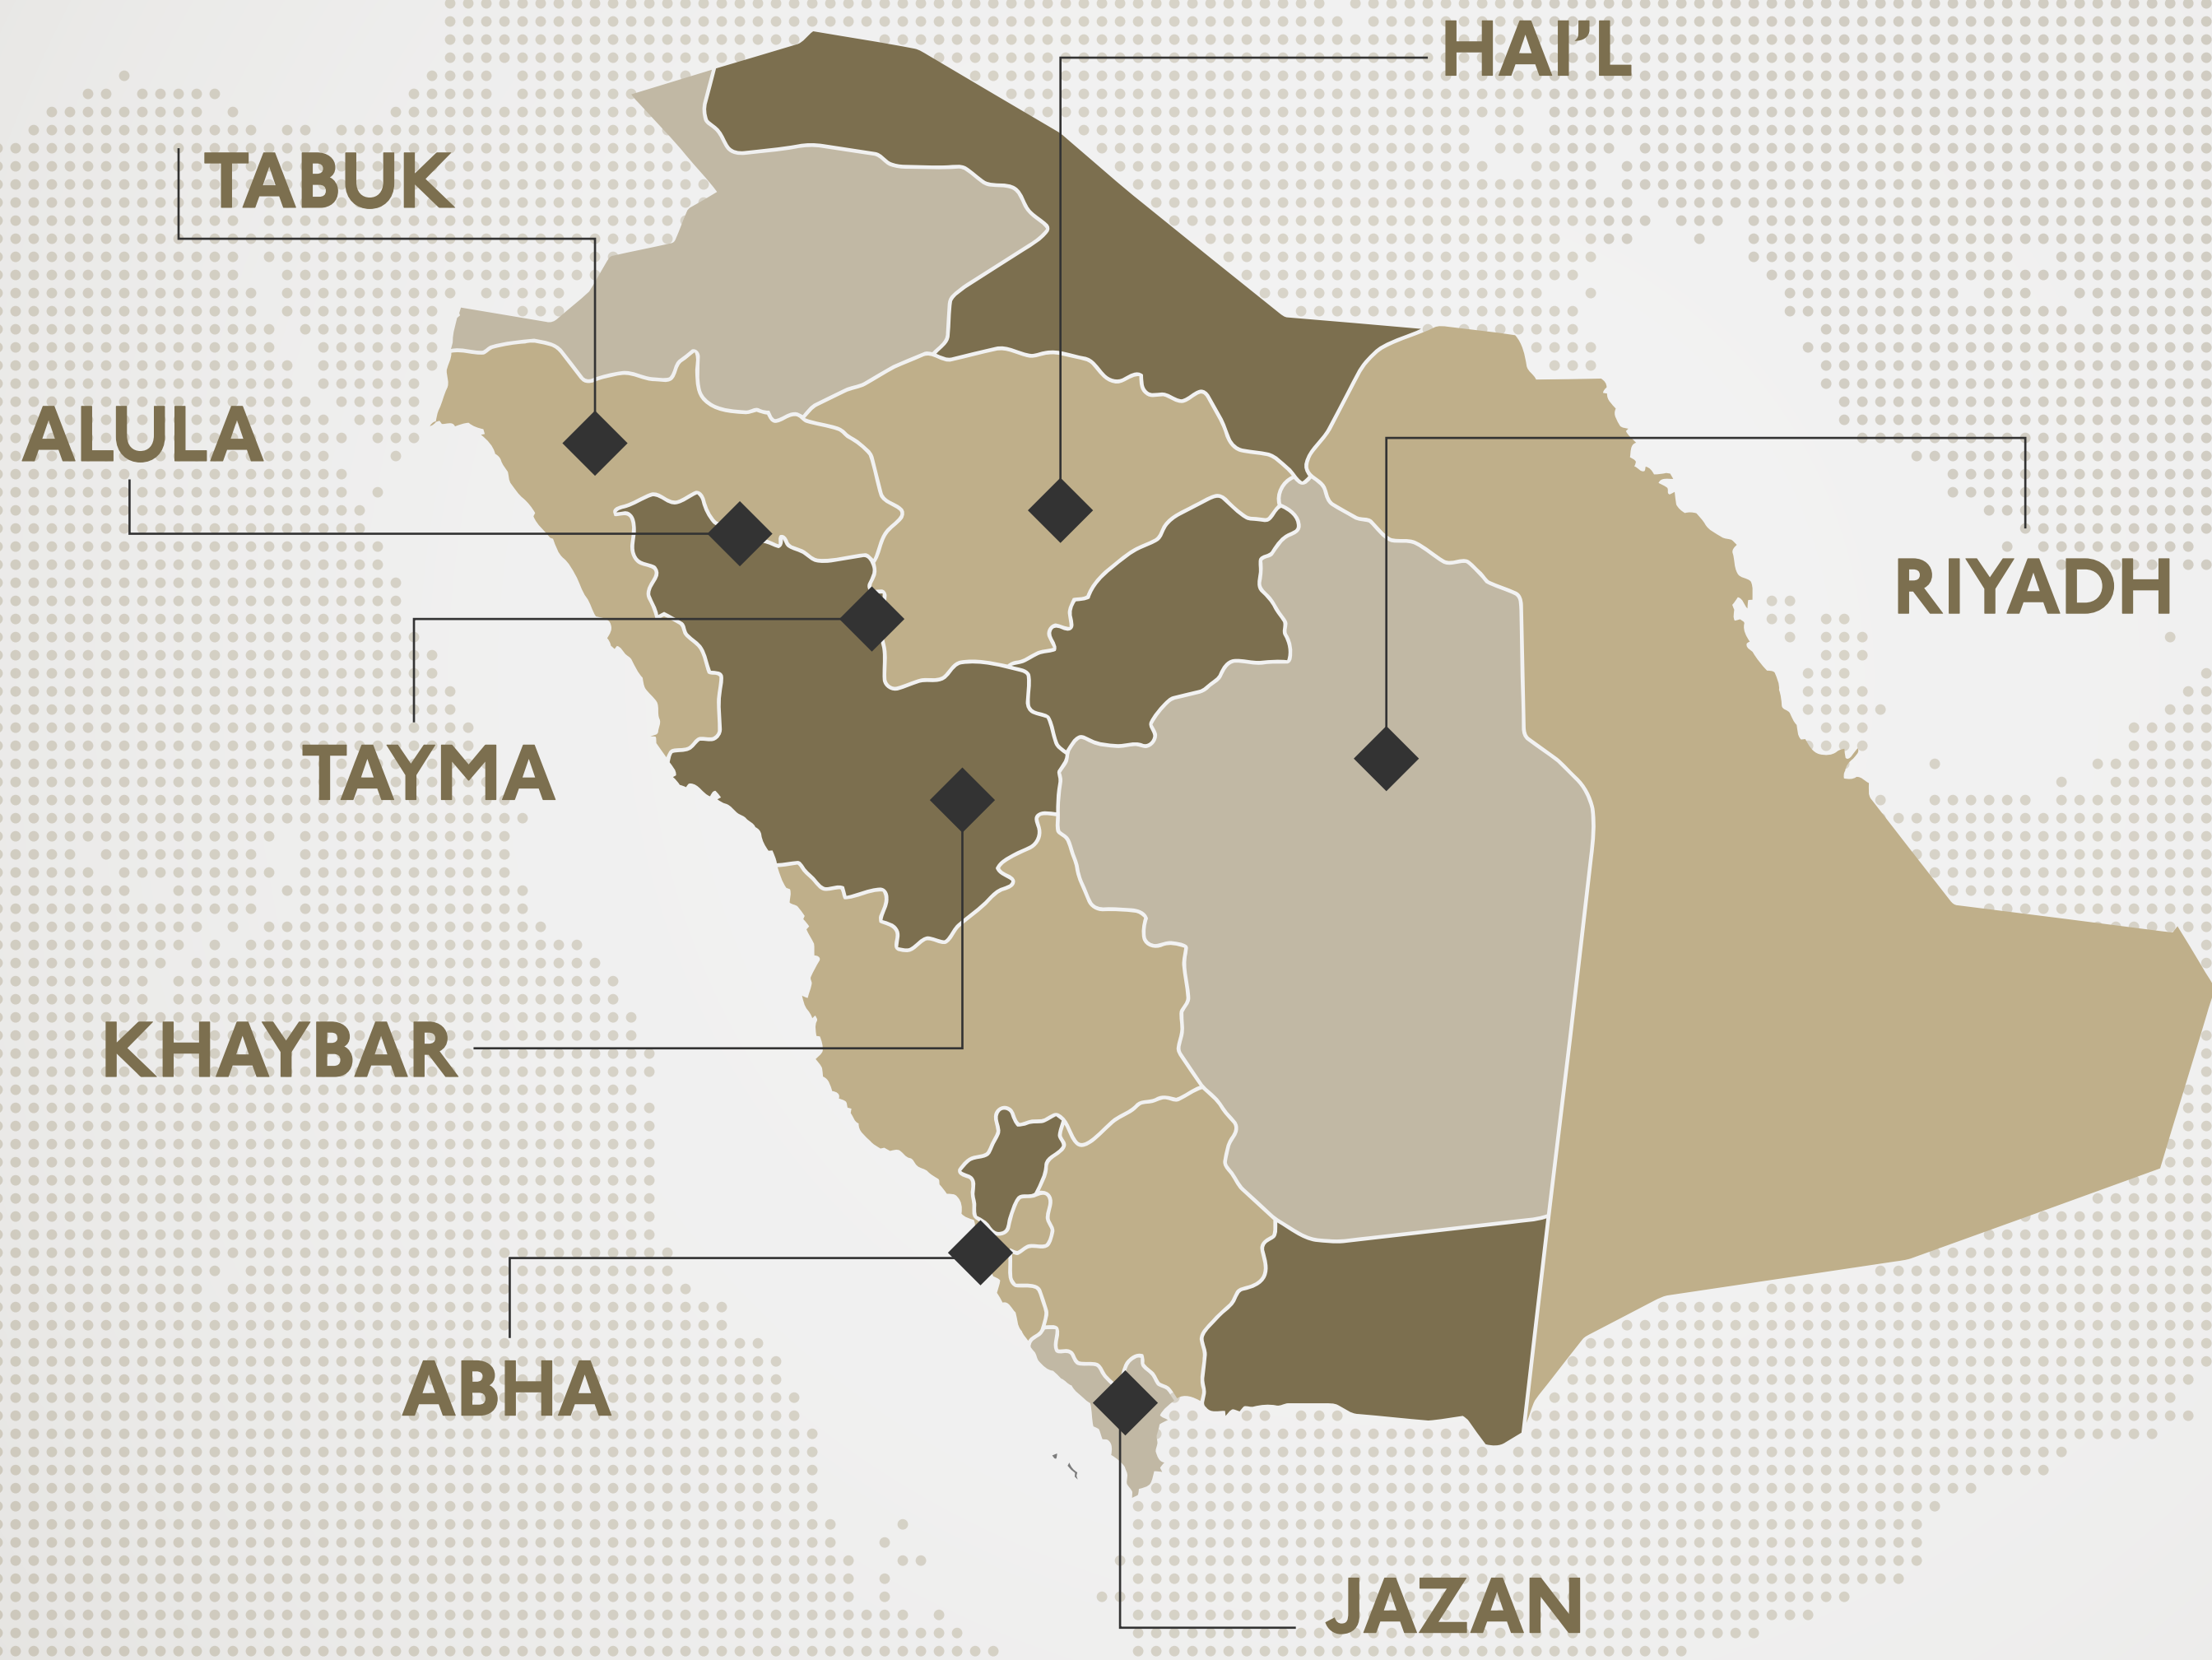

We leverage our expertise to revitalize spaces through a thoughtful blend of **heritage** and **contemporary design**. By applying **placemaking principles**, we aim to create vibrant and **functional environments** that foster a strong sense of community.

We believe in strong ethics and commitment on every project, and we work closely with others to achieve exceptional results through collaboration and innovation, all while prioritizing sustainable practices for a greener future.

The background features a photograph of a stone archway with a green door, overlaid with a semi-transparent brown filter. The archway is made of rough-hewn stone, and the door is a vibrant green color. The overall aesthetic is rustic and historical.

HERITAGE & RESTORATION

Amsy actively contributes to heritage preservation through meticulous restoration projects that breathe new life into historical structures.

“Our heritage is a source of pride, and we will preserve it for future generations.”

سيفي والسعادة.

In the heart of the arid
stretch in a trance, a single
barren space.

Human hands, with lines
behold. From this wellspring
in a vibrant line.

A beating heart, a pulsating
sight. Nature and human
oasis, a balance restored.

Breathing with the audacious
synergy we see. The exquisite
celebration of life, hand in

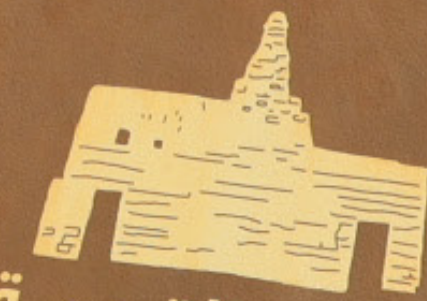

ALULA

بئر الحجاج

تم إنشاء البئر في عام 1371 هجري (1951 م) بحسب النقش التأسيسي الموجود فوقه. وقد أنشاه صالح الحجاج لمساعدة سكان الجزء الجنوبي من البلدة للحصول على الماء من مورد قريب بدلا من الذهاب إلى مسافة بعيدة كحمام الجنبية الذي يقع في الجزء الشمالي من البلدة.

Well of AlHajjaj

From AD 1951 / AH 1371, when the new well was established by Saleh AlHajjaj, residents of the southern district of AlUla were able to draw water from a closer source rather than from the well at Hammam AlUnainah in the northern part of the town.
